Profile Objective

Dynamic and results-oriented Software Engineer with demonstrated expertise in MERN stack development and Golang backend engineering.

Skills

- MERN Stack Development
- JavaScript (JS)
- Object-Oriented Programming (OOP)
- SOLID Principles
- Database Design and Management
- MySQL
- MongoDB
- Scalable System Design
- Go/Golang
- Amazon Web Services (AWS)
- Docker and containerization
- Version Control and Collaboration Tools
- Unit Testing
- Agile and Scrum methodologies
- Microservices architecture

Experience

04/2023 - Current

Software Engineer, **Gray Matrix**, Mumbai

- Developed a broadcast notification system capable of sending messages to over 1 million users by leveraging batch processing and dynamic queuing (BullMQ, AWS SQS). Designed scalable workers that dynamically spin up per channel (WhatsApp, SMS, Email) to handle distributed workloads efficiently.
- Led the development of eKYC Version 2, incorporating advanced facial recognition and liveness detection, using AWS services.
- Revamped the eKYC system by integrating AWS Rekognition for facial recognition and ID verification.
- Engineered 'Skill Builder,' a no-code chatbot platform that allows non-technical users to create and deploy custom chatbots.
- Developed and launched a scalable news moderation feature for Talkk.ai, enabling region-specific news delivery via chatbots.
- Built a referral system for a banking client, enabling account holders to share referrals with incentive-based rewards.
- Contributed to the DigiLoan platform by developing backend and frontend modules to support instant loan approvals.
- Developed secure authentication mechanisms, and strengthened access controls for a betting platform under VI Capitals.

01/2022 - 01/2023

Full Stack Developer, **Tag8**, India

- Revamped Tag8's website and backend infrastructure to enhance performance, stability, and system reliability.
- Refactored legacy React class components into functional components with hooks, modernizing the frontend codebase, and reducing technical debt.
- Designed and implemented new UI features to enhance usability, and provide a smoother customer experience.
- Developed a comprehensive logistics platform with backend and frontend modules, tailored

to specific client requirements.

01/2021 - 01/2022

Full Stack Web Developer, **Competitive Fieldwork And Research**, Mumbai

- Developed and optimized user interfaces with React, improving page responsiveness, and ensuring smooth user interactions across key dashboards.
- Built and maintained backend services with Node.js and Express, integrating multiple third-party APIs for real-time data collection and processing.
- Collaborated with cross-functional teams to design and implement real-time reporting and data visualization features, using modern JavaScript frameworks.
- Applied application security best practices, including OWASP guidelines, secure authentication, and input validation, to safeguard against vulnerabilities.

Education

01/2018

BSc, IT

Vidyalankar School Of Information Technology

01/2016

Diploma

Vidyalankar Polytechnic

Languages

Marathi: First Language
